WATERLESS CUTTING

THE EXPERTS IN WATERLESS CUTTING

IQ Power Tools specializes in the design and manufacture of innovative power tools that incorporate the latest technology and industry advancements. With a strong focus on dust control and efficiency, our products are designed to address the specific needs of professional contractors and tradespeople. Our commitment to quality and performance is evident in our wide range of saws, drills, and dust extraction systems, all engineered to provide precision, durability, and safety. At IQ Power Tools, we believe in combining power with intelligence, ensuring that each tool not only performs at its best but also contributes to a cleaner, healthier work environment. Our dedication to continuous improvement and customer satisfaction drives us to constantly innovate and refine our products, making us a trusted name in the power tool industry.

iQ360XT

The iQ360XT® Series is tough, built for professionals and designed to last. With basic maintenance – like changing the filter annually – your iQ360XT® will last for years.

iQMS362i

The iQMS362i sets a new standard in construction with its unparalleled speed, precision, and versatility in cutting materials. Its portability, power efficiency, and superior dust control make this 420mm dry-cut masonry saw the premier option for masonry and hardscape experts.

iQ1550

The iQ1550 is a 546mm dry cut masonry saw with integrated dust control, aimed at professional contractors. It offers a solution to the issues of wet cutting, enhancing efficiency, profitability, and safety by maintaining a dust-free work environment.

BUILT-IN DUST CONTROL

IQ Power Tools' dust control technology represents a significant advancement in the power tools industry, offering substantial benefits to professionals. Foremost among these is the enhancement of workplace health and safety. By effectively capturing up to 99.5% of dust at the source, this technology drastically reduces the inhalation of harmful silica dust, a known hazard in construction environments. This not only ensures compliance with health regulations but also contributes to a cleaner, more sustainable work environment. Additionally, the reduced dust accumulation leads to less cleanup time, increasing overall efficiency and productivity on job sites. The tools' innovative design minimizes the need for external dust collection systems, making them more portable and user-friendly. In essence, IQ Power Tools' dust control technology provides a cleaner, safer, and more efficient solution, benefiting both the user and the environment.

iQ426 HEPA

- HEPA H14 RATED
- 190CFM SUCTION POWER
- 22 KG DUST CAPACITY

CYCLONE VACUUM CLEANER WITH HEPA FILTER

From drywall dust to saw dust, the iQ426HEPA is designed to be the most versatile dust extractor on the market today.

The iQ426HEPA separates itself from the competition with its 4 stage filtration system and unmatched, Super Duty Performance! Engineered with advanced cyclonic technology, less than 1% of the dust ever reaches the filter meaning vacuum and airflow stay strong.

The iQ426HEPA dust extraction vacuum is a complete revolution for the construction

**Less than 1% of dust
ever hits the filter.**

Vacuum stays strong,
optimizing dust collection.

VOLTAGE	230v
TOTAL SYSTEM AMPERAGE	2300 W
AIR FLOW	322 M /H
VACLIFT	25KPA
VAC WEIGHT	27 KG
SOUND LEVEL	84.5 dB(A)
FILTER TYPE	iQ Dura Bond & HEPA
INLET DIAMETER	50mm
EFFECTIVE DUST CAPACITY	22 KG
VAC DIMENSIONS	584mm x 1047mm x 864mm

4 STAGE FILTRATION SYSTEM

2 stage cyclonic and a 4 stage filtration system:

- 1st stage - The primary cyclone picks up the largest sized dust particles.
- 2nd stage - The 6 secondary cyclones then pick up medium to small sized dust particles.
- 3rd stage - Particles down to 0.5 microns are captured by the Durabond filter.
- 4th stage - The HEPA filter captures 99.97% of all particles down to 0.3 microns.

DUST CONTAINMENT

The iQ426HEPA utilizes a 38 Liter/22 kg dust containment tub with optional heavy duty dust collection bags with convenient zip tie closure, making dust disposal easy, efficient and safe.

CART & ACCESSORIES

The heavy duty cart designed with industrial grade steel, provides protection and durability for the iQ426HEPA while maximizing job site manoeuvrabilities. The iQ426HEPA cart includes integrated accessory rack with nozzles and adapters to meet your dust collection demands.

iQ360XT

The iQ360XT Series is tough, built for professionals and designed to last. With basic maintenance – like changing the filter annually – your iQ360XT®

www.iqpowertools.eu

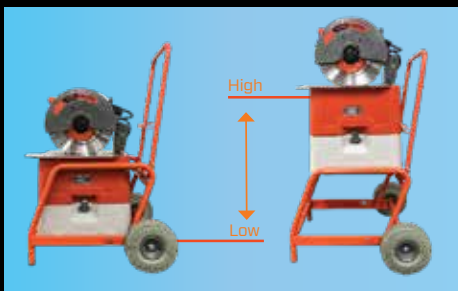

THE WORLD'S FIRST 355MM DRY-CUT MASONRY SAW WITH INTEGRATED DUST CONTROL

The iQ360XT Series is tough, built for professionals and designed to last. With basic maintenance – like changing the filter annually – your iQ360XT® will last for years.

SPECS

- Tested to Capture 99.5% of the Dust
- Compact & Lightweight—Easy to Transport

VOLTAGE	230v
TOTAL SYSTEM AMPERAGE	2300 W
SAW MOTOR AMPERAGE	1800 W
VAC MOTOR AMPERAGE	500 W
SAW WEIGHT	30 KG
BLADE SIZE	356mm
FILTER TYPE	iQ Dura Bond Cartridge
CUTTING DEPTH	114mm H X 305 mm L
EFFECTIVE DUST CAPACITY	22.7 KG
SAW DIMENSIONS	432mm x 762mm x 508 mm

VERSATILITY

Work low on your knees or up high on a scaffold. The iQ360XT is as flexible as your jobsite.

IQ POWER MANAGEMENT

Operates using a standard 230v and 2300W. Soft-start technology controls the input power ramp up for a smooth, uninterrupted operation.

PERFORMANCE

Operates using a standard 230v and 2300W. Soft-start technology controls the input power ramp up for a smooth, uninterrupted operation.

iQMS362i

420mm metselzaag met geïntegreerde stofbeheersing.

THE WORLD'S FIRST & ONLY 420MM DRY-CUT MASONRY SAW WITH INTEGRATED DUST CONTROL

iQMS362i® is the next game changer for the construction industry. It's unmatched speed and accuracy, versatility in material cutting, portability, power management, and dust collection make the iQMS362i 420mm dry-cut masonry saw with integrated dust control the **ONLY** choice for masonry and hardscape professionals.

SPECS

- 610mm rip cuts •457mm diagonal cuts
- Cutting depth: 140mm •OSHA Compliant

VOLTAGE	230v
TOTAL SYSTEM AMPERAGE	2300 W
SAW MOTOR AMPERAGE	1800 W
VAC MOTOR AMPERAGE	500 W
SAW WEIGHT	68 KG
BLADE SIZE	Q-Drive 420mm
FILTER TYPE	iQ Dura Bond Cartridge
CUTTING DEPTH	140mm
EFFECTIVE DUST CAPACITY	18KG
SAW DIMENSIONS	813mm x 1016mm x 1092mm

VACUUM SYSTEM

Dust is captured within the blade guard, rear dust guard, and down-draft louvred table via a high-powered, integrated vacuum system.

DUST CONTAINMENT

Built with an integrated dust collection chamber that holds 18 kgs of dust.

MOBILITY

The iQMS362i's high-flotation tires allow one person to easily move over rough jobsite terrain.

iQ1550

546mm Dry Cut Masonry Saw with Integrated Dust Control

DRY CUT WITHOUT THE DUST

Introducing the iQ1550™, 546mm Dry cut masonry saw with integrated dust control. Designed for professional contractors to eliminate the problems with cutting wet. This saw saves you time and increases your profitability while maintaining a safe, dust-free work environment.

- Powerful 230v Super Duty 4000 Watt Saw Motor & 3000 Watt Vac Motor
- Cutting capacity of traditional 20" masonry saws
- Auto Spin, Durabond Filter

VOLTAGE	230v
TOTAL SYSTEM WATTS	7000 W
SAW MOTOR WATTS	4000 W
VAC MOTOR WATTS	3000 W
SAW WEIGHT	172 KG
BLADE SIZE	546mm Blade
FILTER TYPE	iQ Dura Bond Cartridge
CUTTING CAPACITY	203mm H x 406mm L
EFFECTIVE DUST CAPACITY	35KG
SAW DIMENSIONS	813 W x 1702mm H x 1295mm L

VACUUM SYSTEM

Dust is captured at the cut via a high-powered integrated vacuum system.

DUST CONTAINMENT

Built with an integrated dust collection chamber that holds 35kg of dust.

FORKLIFT POCKETS

Forklift pockets included on the bottom of the saw for easier transportation to job sites.

CENTER LIFT POINT

Equipped with a Center lift point that allows the iQ1550™ to be lifted into a job site.
